CSI REPORT 2020

INTRODUCTION: -

Computer Society of India is the first and largest body of computer professionals in India. It was started on 6 March 1965 by a few computer professionals and has now grown to be the national body representing computer professionals. It has 72 chapters across India, 511 student branches, and 100,000 members. The Computer Society of India is a non-profit professional meet to exchange views and information, learn and share ideas. The wide spectrum of members is committed to the advancement of theory and practice of Computer Engineering and Technology Systems, Science and Engineering, information processing and related Arts and Sciences. The Society also encourages and assists professionals to maintain integrity and competence of the profession and fosters a sense of partnership amongst members. Besides the activities held at the chapters and student branches, the Society also conducts periodic conferences, seminars.

Our college conducts the CSI seminar every year wherein all the students of second year engineering, third year engineering and fourth year engineering participate in various events and sessions conducted by the students of our department who are hands on with various ongoing topics related to programming and software developments. The CSI events for the academic year 2020-2021 were conducted from 6th October 2020 to 8th October 2020 from 3:30pm to 5:30pm using various online platforms. All events were conducted online on Ms Teams Platform.

Workshops

1. Machine Learning

The Machine Learning workshop was conducted by Aditya Sawant, Keval Joshi and Chirag Jawale in the CSI event. In this workshop basics, different prediction models, steps to create a model, and finding model's accuracy was covered in theory. Later demonstration of a real-life machine learning project was given to the students.

2. Game Development

The Game Development workshop was conducted by Ved Patil, student of Information Technology sem V. The topics covered in this workshop were Viewport and navigation, geometry editor, Actor class, importing assets, material system, particle system, game UI and coding game logic with GameMode base class. Optimization of the game by reducing no of vertices with the geometry editor was covered. A mini game was developed in the workshop while explaining the topics.

3. Programming and AWS 101

The Programming and AWS 101 workshop was conducted by Hritesh Sonawane, IT SEM 5. Around 25 students from IT SEM 3 and SEM 5 attended the 2-hour workshop. A brief overview of AWS was given along with a demo on website hosting. Various career options and AWS certifications were discussed. The latter part of the workshop was focused on Web Security and different web attacks i.e. XSS, CSRF, SQL Injection, DDOS, MITM, Hashing techniques etc. Tips and hacks on how to secure your websites were given along with some exploitation walkthroughs.

Day 2: 07/10/2020

Workshops:

1.React

The workshop was conducted by Archit Bhonsle of Semester 5 of Information Technology and was open to students from all the semesters. The session lasted for 2 hours and covered the basics of React. Using a simple Todo App as an example the workshop illustrated the need for front-end frameworks, the fundamentals of state and props, component structure and styling. Advanced topics such as navigation, component frameworks, React frameworks were also discussed to give participants a better idea of the React ecosystem.

2.Natural Language Processing + GANS

The workshop for Natural Language Processing and GANS was conducted by Rohan Gawhade and Lokesh Ramdev Bohara of Information Technology Semester 5. The workshop was open for semester 3, 5 and 7. The topics covered in Natural Language Processing were Introduction to NLP, applications, it's needs, tools and libraries, Introduction to deep learning and working of sentiment analysis project.

The workshop on Gans covered the fundamentals of conv-nets and then took a brief dive into the idea behind Gans and their architecture. It also mentioned various gan models developed and their applications. Later the detailed concept of Progressive Gans was explained and a working model was demonstrated. All doubts of students were addressed and properly explained.

Contests:

1.Quiz Competition

The quiz contest was conducted on a platform named Kahoot. The link and contest pin was given to participants in the chat section at the teams meeting. Participants have to enter in the contest with their nickname as their roll number. Once participants have entered into the quiz room with a given room-id, they were not able to exit the room or able to re-attempt the previous question once they moved on to the next question or the time limit exceeded. The winners were announced based on their final score and contest rank.

Winners:

Rank 1: Allan Joe (501803, sem-5)

Rank 2: Calista Gonsalves (501823, sem-5)

2.Coding Competition

The contest was hosted on HackerRank, with a standard HackerRank leaderboard. A lot of functionality was provided by the website which helped the team to tweak the platform as per their requirements. After successful login and signing up by the contestants, they were given 9 questions ranging in difficulty. From the dashboard available to moderators, the statistics of the contest were being monitored at all times. The winners were decided after running a plagiarism check on the submitted answers.

Winners:

Rank 1: Rohit Raina (501855, Sem 5)

Rank 2: Dinesh Farad(501768, Sem 7)

Day 3: 08/10/2020

The workshop on App Development using Flutter was conducted by Atharva Patade, Gaurang Pawar and Vaibhav Singh of the Department of Information Technology (Semester V). The workshop was open for semester III, V and VII students. The 2-hour workshop included a brief introduction to flutter, dart and an overview of the built-in widgets and the external libraries built by the community. The session also included a code-along (Todo task application). The participants were able to build the Todo application using the fundamentals of flutter widgets and the dart programming language. All the doubts and queries were cleared away by the end of the workshop.

2. Building AI Chat bot with RASA

The workshop for Building AI Chatbot with RASA was conducted by Abhishek Gupta and Ansh Chhadva of Information Technology Semester 5. The workshop was open for semester 3, 5 and 7 students. This workshop was not only theory-based but also equipped with hands-on practice. The topics covered were right from the basics, from introduction to chatbot and Rasa components upto advanced concepts like pipelines and policies in Rasa. In the end we got hands-on and showed how to make COVID BOT from scratch which not only answers some FAQ about corona but also will give the latest stats of cases in India and states under it.

Contests:

1.Complete the Code

The contest committee team had hosted a website (<http://ctccontest.epizy.com/>) to conduct this contest. The contest had 8 questions. Each question varied in terms of difficulty and logic. The participants could access only one question at a time. After submitting the previous question, they move on the next one. Participants cannot access previous questions again.

The event was conducted for 1 hour 45 minutes, started at 3:30pm and ended at 5:15pm.

Winners:
