#### Brief Summary of the Workshop

##### Objective:

The main Objective of the Git GitHub Workshop is to provide in-depth Knowledge about how Git GitHub works and how we can use it.

##### Technical Description:

The Git workshop started off with the basic Git commands. A project for building a book was used as an example repository. Concepts including branching, merging, repository creation, etc. were covered. With the basic command-line out of the way, the internals of Git was covered next. The internals of Git was explained, by building a model of a Git like version control system from scratch. The discussion started with building a single file version control system, and then adding support for commit logs, branching, merging, and finally multi-file support. The purpose and use of staging was also discussed.

##### Outcomes:

Upon Completion of the workshop ,Students should be able to:

1. Understand what Git-Github is and also its components.
2. It also gave a brief knowlegde on about repository in git-github, cheatsheets, etc.
