Institute Vision

Institute Vision

To evolve and flourish as a progressive centre for modern technical education, stirring creativity in every student leading to self-sustainable professionals, through holistic development; nurtured by strength and legitimate pride of Indian values and ethics.

Institute Mission

- To provide industry oriented quality education.
- To provide holistic environment for overall personal development.
- To foster relationship with other institute of repute, alumni and industry.

Department of Information Technology

Department Vision

To become a leading center of excellence for quality education, advance research and development in the field of Information Technology for self-sustaining professionals.

Department Mission

- To provide industry oriented quality education and training to students related to cutting edge technologies in the field of information technology.
- To promote multidisciplinary activities that inspires students to serve society through innovative applications.
- To promote entrepreneurship skills in students with overall personality development.

PROGRAM EDUCATIONAL OBJECTIVES (PEOs)

Graduate will be able to:

- Adapt technological changes in the field of information technology.
- Excel in higher education and professional career.
- Demonstrate multidisciplinary and entrepreneurship skills.

PROGRAM SPECIFIC OBJECTIVES (PSOs)

Graduate will be able to:

- ❖ Adapt to the technological advancements in the field of Artificial Intelligence and Data Science.
- ❖ Develop research strategy in the domain of Internet of Things and Security.

HOD's Message

Dr. Shubhangi Vaikole

Being a part of Fr. C. Rodrigues Institute of Technology and leading the department of Information Technology, I take this opportunity to broach the department. The constant drive of the institute to provide innovative and quality education, has motivated us to develop and provide futuristic education to the students.

The department strives to provide students with core competence in the field of IT which helps them to comprehend technical concepts to develop novel projects and provide solutions to the real-life problems. Our faculty work with excellent team spirit in different technical team which leads to key research publications in these areas. We believe in tailored grooming of each student's needs by organizing technical workshops and competitive events such as Hackathons, Seminars from eminent voices of the industry, which helps them to access every sub-domain in the field of Information Technology. To bridge the gap between industry and academia, the CSI students section are actively organizing event listed above/below. Students not only participate in these events but lead them, thus helping them to improve on important attributes such as collaboration, communication, and teamwork. Our annual events like AITSS and Infobits empowers our students to collaborate with students from other colleges, thus inculcating a sense of community.

Our students have won several accolades at University, National and International levels. Our Department's placement records are unvaryingly high and we are proud that the number of students who are getting placed is increasing year after year. We have a strong alumni network who work with renowned organizations such as Shell, Cognizant, TCS, Infosys, Accenture, Capgemini, etc

The ace infrastructure, well qualified faculty, staff and T&P ensures bright future. I am confident that our students will excel in all stream of life and emerge as an asset to the organization they belong to, the institute, parents and also to the country, at large.

I congratulate all the students and the team of IT for their brilliant and indigenous efforts. On this note, I wish all the students a great academic career.

Editor's Note

Juhi Fernandes

Welcome to a world where technology and creativity meet in perfect harmony. In Symphysis 2024, we take you on a journey that blends art, intellect, and technology into a seamless experience. "Symphysis" means a coming together or a fusion, and that's exactly what this magazine represents – the fusion of ideas, innovation, and expression. Our pages are filled with thought-provoking articles that explore the latest advancements in technology, from AI's incredible growth to the ethical challenges of our digital world. We celebrate the achievements of our students and faculty, showcasing the bright minds who are shaping the future with their coding and computational skills.

In this magazine, you'll find a mix of experimental and innovative art, where digital creations push the limits of traditional perception. Our event pictures capture the excitement and energy of our community, making you feel like you're right there in the action. These visuals highlight the blend of human passion and technological brilliance that defines Symphysis 2024.

As we navigate the digital age, we celebrate the innovation and the humanity that drive us forward. Let Symphysis 2024 be a testament to the beautiful symphony of human creativity and technological wonders. Join us in this celebration where technology and art come together to inspire and ignite the future.

TECHNOVATION'23

The Intra Department level technical event "TECHNOVATION 2023" organized by IT department under CSI Student Chapter took place from 2nd August to 4th August. The event was led and executed successfully under the guidance of Dr. Vaishali Bodade ma'am. The Event was a part of one of the various technical and social events organised under CSI every year since its inception. These events are organised every year with the objective to provide platform for the students to showcase their talent with a competitive spirit and for them to gain more knowledge in the field. The event was successful enough to attract as many as 170 students of registrations for each day, making it an event attended by more than 140 students each day. The seminars on Innovation and entrepreneurship, AR & VR 3D animation & VFX, Impact of generative AI, cybersecurity, And the online events that took place were tech memes, Logo making, UI/UX design and Virtual venture And offline contests like Code combat, treasure hunt, Imposter artist, codemia, And workshops on Git GitHub, App development, AWS, Machine learning . Here, the winners were encouraged with a certificate and The participants were also given certificates as a token of encouragement. The event was a great success due to the contribution from the third-year students and the curiosity of the juniors to learn something new.

CSI-EVENTS

INFOBITS'24

Infobits was conducted on 02/03/24 in the diploma building seminar hall, 4th floor. The seminars were given on "Environment and Sustainability" and "Cutting edge technology- Embracing the world of GPT". It was conducted for the whole IT department.

AGNETHON'24

Agnethon was conducted on 02/03/24 at the moot court in Agnel's School of Law. A total of 110 teams consisting of 415 students participated in Agnethon. This event was conducted by CSI-IT in collaboration with CSI-COMPS and E-Cell.

CSI-EVENTS

TECHSPARKS'24

Techsparks was conducted by IT department on 04/04/2023 where students of FCRIIT as well as other colleges participated. The participants showcased their skills through projects and best projects were rewarded based on the regulations of the events.

The Catalysts for Change

METAVVERSE

By Sakshi More(Sem 5)

Imagine a world where you can meet friends, attend classes, work, and play games, all without leaving your home. This is the Metaverse, a virtual universe that blends the digital and physical worlds. It is like a massive, interactive, and immersive 3D internet.

The idea of the Metaverse comes from a 1992 science fiction book called 'Snow Crash' by Neal Stephenson. In the book, people used avatars to explore a vast virtual world. Today, thanks to technology like virtual reality (VR) and augmented reality (AR), the Metaverse is becoming a reality.

Key Elements of the Metaverse

1. Virtual Reality (VR) and Augmented Reality (AR):

- VR: Creates a completely digital environment where you can immerse yourself.
- AR: Adds digital elements to the real world, like Pokémon Go or Snapchat filters.

2. Blockchain and Cryptocurrencies:

- Blockchain technology ensures secure and transparent transactions.
- Cryptocurrencies are digital money used within the Metaverse.

3. Artificial Intelligence (AI):

- AI helps create realistic virtual worlds and personalized experiences.

4. Internet of Things (IoT):

- IoT connects real-world devices to the internet, making them smarter and more interactive.

What Can You Do in the Metaverse?

1. Socializing:

- Meet friends in virtual cafes, attend concerts, or join clubs, no matter where you are.

2. Learning:

- Attend virtual classrooms, explore historical sites in 3D, or practice skills in simulated environments.

3. Gaming:

- Play games that feel incredibly real, explore vast virtual worlds, and even create your own games.

4. Shopping:

- Visit virtual stores, try on clothes, and buy items, all from the comfort of your home.

5. Healthcare:

- Doctors can practice surgeries in VR, and patients can receive remote care and therapy.

Challenges Ahead

1. Privacy and Security:

- Protecting personal information and ensuring safe transactions are crucial.

2. Access for Everyone:

- Making sure everyone can use and benefit from the Metaverse, not just those with advanced technology.

3. Rules and Regulations:

- Developing laws and guidelines to manage digital property, identity, and ethical behavior in virtual spaces.

The Road Ahead

The Metaverse is still in its early stages, but it is growing fast. It has the potential to transform how we live, work, and play. As technology advances, the Metaverse will become more accessible and integrated into our daily lives, offering endless possibilities for creativity and connection.

Last but not least, Metaverse is more than just a trend; it's the future of digital interaction. By blending the physical and virtual worlds, it opens up new ways to connect, learn, and explore. As we step into this new digital frontier, it is important to embrace the opportunities while addressing the challenges to build a Metaverse that benefits everyone.

The Rise of Fintech: How Technology is Changing the Financial Industry

By Aakanksh Mishra(Sem 5)

Financial technology, or fintech, has swiftly transformed the financial landscape by integrating technology into financial services to enhance accessibility and efficiency. In a world where technological advancements are ubiquitous, the financial sector has not been left untouched. The advent of fintech has redefined how we manage money, with innovations that are reshaping traditional financial systems and offering new ways to conduct financial transactions.

One of the most significant changes brought about by fintech is the rise of mobile payments and digital wallets. Platforms like PayPal, Apple Pay, and Google Wallet have made transactions more convenient than ever before, enabling users to make purchases with just a tap of their smartphone. This shift towards digital and contactless payments has accelerated, particularly in the wake of the COVID-19 pandemic, as consumers and businesses alike sought safer and more hygienic payment methods.

Another groundbreaking innovation in fintech is the emergence of cryptocurrencies and blockchain technology. Cryptocurrencies like Bitcoin and Ethereum are based on blockchain, a decentralized ledger that allows for secure and transparent transactions without the need for a central authority. This technology is challenging traditional banking systems by offering an alternative to fiat currencies and creating new opportunities for investment and financial growth. Although still in its early stages, the adoption of cryptocurrencies is steadily increasing, with some countries and financial institutions beginning to explore and integrate them into their systems. Fintech has also revolutionized the investment landscape through the development of robo-advisors. These automated platforms, such as Wealthfront and Betterment, use artificial intelligence to provide personalized investment advice and portfolio management. Robo-advisors have made wealth management accessible to a broader audience, democratizing the investment process and enabling more people to grow their wealth.

The rise of fintech is not without its challenges, particularly for traditional financial institutions. Banks and other financial organizations are facing increasing competition from fintech companies, which are often more agile and better equipped to meet the demands of today's tech-savvy consumers. However, rather than viewing fintech as a threat, many traditional banks are choosing to collaborate with fintech companies to enhance their digital offerings. Open banking initiatives, which encourage data sharing between banks and fintech companies, are further driving this collaboration, enabling banks to improve their services and better meet the needs of their customers. Despite its many benefits, fintech also presents regulatory challenges. The rapid pace of innovation in the fintech space has outpaced the development of regulatory frameworks, leading to concerns about data privacy, security, and compliance with anti-money laundering (AML) laws. Different regions around the world have adopted varying approaches to fintech regulation, with the European Union and the United States taking different stances on issues such as data protection and consumer rights. This variation in regulatory approaches complicates cross-border operations for fintech companies, requiring them to navigate a complex web of laws and regulations.

Fintech has also made significant strides in promoting financial inclusion, particularly in developing countries where access to traditional banking services is limited. Mobile banking platforms, such as Kenya's M-Pesa, have provided millions of people with access to financial services, enabling them to save, borrow, and transfer money securely. By providing access to banking and credit through mobile platforms, fintech is driving economic growth and empowering underbanked populations around the world. Looking to the future, fintech is poised to continue its rapid evolution. The next wave of fintech innovations is likely to be driven by advancements in artificial intelligence, the development of super apps that combine multiple financial services into a single platform, and the broader adoption of blockchain technology. Additionally, the rise of quantum computing could have profound implications for financial security, potentially requiring new data protection standards to safeguard against quantum threats. In conclusion, fintech is transforming the financial industry in profound ways, offering both new opportunities and challenges. As fintech continues to evolve, careful regulation and collaboration between traditional financial institutions and fintech companies will be essential to ensure that these innovations are safe, secure, and accessible to all.

THE SILENT STRUGGLE: UNVEILING THE MENTAL HEALTH CRISIS AMONG COLLEGE STUDENTS

The mental health crisis among college students has become a growing concern in recent years, with increasing numbers of students reporting symptoms of anxiety, depression, and other mental health issues. The pressures of academic performance, financial stress, social challenges, and the transition to adulthood contribute to a perfect storm of factors that can seriously impact students' mental well-being. Understanding the scope of this crisis and addressing the underlying causes is crucial for supporting the mental health of this vulnerable population. One of the primary factors contributing to the mental health crisis among college students is the pressure to succeed academically. The competitive nature of higher education, coupled with the high expectations placed on students by themselves, their families, and society, can lead to overwhelming stress. Many students feel the need to excel in their studies, maintain high grades, and secure a successful future, often at the expense of their mental health. This pressure can result in burnout, anxiety, and depression, particularly when students struggle to balance their academic responsibilities with other aspects of their lives.

Financial stress is another significant contributor to the mental health challenges faced by college students. The rising cost of tuition, housing, and other expenses has led many students to take on substantial debt, work multiple jobs, or rely on financial aid to make ends meet. The constant worry about money and the fear of graduating with significant debt can exacerbate feelings of anxiety and hopelessness. Additionally, students from low-income backgrounds may face additional stress related to financial insecurity, further compounding their mental health struggles. Social challenges also play a key role in the mental health crisis among college students. The transition to college often involves leaving behind familiar support systems, such as family and friends, and adjusting to a new and often unfamiliar environment. This can lead to feelings of loneliness, homesickness, and social isolation, which can negatively impact mental health. For many students, building new relationships and finding a sense of belonging in college can be challenging, particularly for those who may feel marginalized or different from their peers.

The transition to adulthood is another critical factor that can contribute to mental health issues among college students. This period of life is marked by significant changes and uncertainties, as students navigate their identities, future careers, and personal relationships. The pressure to make important life decisions, such as choosing a major or planning a career path, can be overwhelming and lead to anxiety and stress. Additionally, the lack of life experience and coping skills can make it difficult for students to manage these challenges effectively, leading to increased vulnerability to mental health problems.

Creating a supportive campus environment is also essential for promoting mental well-being among college students. This includes fostering a sense of community, encouraging open conversations about mental health, and providing opportunities for students to connect with others who may be experiencing similar challenges. Colleges can also support students by offering flexible academic policies, such as providing accommodations for mental health issues, allowing for breaks or leaves of absence, and offering alternative assessment options.

Despite the growing prevalence of mental health issues among college students, many students do not seek help due to stigma, lack of awareness, or limited access to mental health services. The stigma surrounding mental health can prevent students from reaching out for support, as they may fear being judged or misunderstood by their peers, professors, or families. Additionally, students may not recognize the signs of mental health issues or may feel that their problems are not severe enough to warrant professional help. Access to mental health services is another significant barrier for college students. While many colleges and universities offer counseling services, these resources are often limited and may not be able to meet the demand. Long wait times, limited availability of appointments, and a shortage of mental health professionals can make it difficult for students to receive the support they need in a timely manner. Additionally, some students may face financial or logistical barriers to accessing mental health care, particularly if they do not have health insurance or if they are attending school far from home.

In conclusion, the mental health crisis among college students is a pressing issue that requires immediate attention and action. The pressures of academic performance, financial stress, social challenges, and the transition to adulthood all contribute to the high prevalence of mental health issues among this population. By increasing access to mental health services, reducing stigma, and creating a supportive campus environment, colleges and universities can play a vital role in addressing this crisis and promoting the well-being of their students. The future success and happiness of college students depend not only on their academic achievements but also on their mental and emotional health.

POETRY

MOM!!

The hour I come back
I search for one in the house
And there she exclaims, oh you home?
Tired, yet keeps going
Wonderful, even in chaos
One of the greatest backer
Worried, yet full of hope
Angry, but patient for never quitting
Attachment of sacrificing for us
Yet amazing, even though doubted
Emotional, nevertheless a rock
If there were various means to express my love
I would have exhausted it
But still, I would look for a few more
So that I can say how worthy I am
To the woman, I call my amma!!

-BY ASHLEY JAMES (SEM 5)

POETRY

FLOWERS OR YOU?

**What thought comes to your mind,
When you look at an adorable flower,
You just wanna pluck it from the branch,
It has such an attractive power.**

**Just like her lips is the red in the rose,
So pretty and bold, and attractive are those,
But you should not always be falling for them,
Coz even the prettiest rose has thorns in it's stem.**

**The golden in the sunflower is like her shiny hair,
So bright and radiant that one should be aware,
They might be wonderful but only a handful can touch,
Coz it's nectar is in a deadly bee's clutch.**

**Her eyes are just like the white in a water lily,
Sparkling with dreams and ambitions silly,
Tender yet beautiful, growing on a pond,
Whose understanding is in the world's beyond.**

**Like her blushing cheeks is the Lotus's pink,
So adorable that it'll make your heart sink,
It's known as a symbol of strength and purity,
Yet it grows in mud, with such maturity.**

**Like the colours of orchids are her dresses,
Used as ornaments, such beauty it possesses,
The enchanting sight of it's petals are a proof,
That to it's infinite wonder, there's no roof.**

**Just like the hibiscus flower is her body whole,
Sweet and divine, and touching to the soul,
Heavenly, yet on the earth is it's presence,
Such magical and precious is its essence.**

**Like the aroma of Lavender is her vibe,
So dazzling and exotic, I can't describe,
Makes me wonder if even real it is,
Like a brainstorming yet delightful quiz.**

**Her character is like the flowers and beyond,
Her thoughts wonder me like a magical wand,
Just like the flowers, she's my most favourite view,
Yes, this poem isn't about flowers, it's about you,
This poem isn't about flowers, it's about you....**

POETRY

AM I HOPELESS?

Though the night is on and the hopes are dim,
The shine is bright and the dark is slim,
To heavens and above, her beauty is lit,
The moon is lovely, isn't it ?

The world is nothing but twisted curves,
and there's some purpose each of it serves,
But the curve she has, the one on her face,
Her smile is the world's most beautiful place.

The oceans are deep, the waters are loud,
The boats are crossed, without a shroud,
But her eyes are deeper, beyond a thought,
Getting lost in them, and love is sought.

Fragrant and delicate are the flowers you see,
filled with beauty upto the highest degree,
But more outstanding are the wavy hair of hers,
guess it's true, love is the most twisted curse.

So bright, so lively, so glorious is the sun,
So joyful it is, like a Nobel prize being won,
But more lovely is the character she holds,
as if an universal phenomenon she unfolds.

The birds that chirp and sing in the morn,
The heart is joyed and a pleasure is born,
But her voice is sweeter, more like a song,
Her words seem true, even if it's wrong.

To eyes are a surprise, the tropical butterflies,
they seem so heavenly, yet only in disguise,
But one's reality may be another's illusion,
She herself is an angel, is the only conclusion.

Her touch, her talks, her mind, her heart,
Did god himself create this art?,
From her heart to the letters in her spelling,
Everything about her is just so compelling.

But is she really how I tell ? or is it just me?
If only she could see what I can see,
i don't see any logic, if any there were,
maybe i am just hopelessly in love with her....
maybe i am just hopelessly in love with her....

Shayari Corner

**Maine apni hi duniya mai kayi duniya banayi aur saare
duniya mai khud ko barbad rakha hai**

**Yeh duniya mere haalat pata lagati hai mere chehre se
Yaha mujhe takk nhi pata maine apna asal chehra kaha
chupa rakha hai**

**Mai apni kahaniyon mai harta hu hamesha
Yeh asal duniya mai to mere liye kuch nhi rakha hai
Mere khawab takk mere khawabon mai pure nhi hue
aaj takk**

**Mere khwabon ne mujhse ek alag hi anna rakha hai
Khair chodo meri dastan meri Dastan mai to sirf
intezaar rakha hai**

**Mujhse to kisi ne yeh takk nhi pucha kya hua Aarsal
tumhe kis cheez ne pareshan kar rakha
hai**

Shayari Corner

**Tum bas sath raho mere,
Tumhare har andhere se mai
ladunga,
Tum bas khwab dekha karo,
Tumhari har khwaish puri
karunga,
Log kehte hai ambar se taare
kyu nhi tod late, ghabrate ho
kya ?
Lekin unhe kon smjhaye, tum
jaisi chand ke pass sitare toh
bohot hai,
Lekin uss chandni ka raat mai
banunga...
Lekin uss chandni ka raat mai
banunga...**

Shayari Corner

Maine aaj bhi uski yaadon ko samet rakha hai
 Jiss kambal mai uske saath kuch waqt bitaya tha
 usko abb bhi lapet rakha hai
 Mahina bohot Barkato waala chal rha hai
 Sab apne jaan maal ki duaein maang rhe Hai
 Aur Ek mai jisne duaon mai maut maang rakha hai
 Naa jaane kaisi yeh meri zindagi hote jaa rhi hai
 Meri ghar pe mere kaise rehna ka faisla Ek panne ke tukde ne kar rakha hai
 Yeh meri adawat-e-zindagi kam thi kya
 Jo mera hausla mere sahare ne mujhe khud se bohot durr Kar rakha hai
 Aur batao jaani kaise ho yeh haal puchne waale dost
 Inhone bhi mujh jaise haare hue insan se dushmani kar rakha hai
 Mai kaise batau ki Mera din kaise guzarta hai
 Bass kuch apne yaar bache hai jinhone mera hausla badha rakha hai
 Hame jiss balay-e-hoor se ishq hua kya bataye
 Abb uss hoor ko koi aur le jayega
 waise bhi iss haare hue qais ke andar kya rakha hai
 Na koi justajoo hai na koi aarzo hai
 Kya batau maine Marne ka har ek tareeka azma rakha hai
 Ki mai aaj yuhi khuda se puch baitha ki mai Marne ke bhi qaabil nhi
 To khuda ne kaha tu qabil hai
 par tere Marne ki hazrat ne tujhe zinda kar rakha hai
 Mujhe abb fark nhi padta hai ab mujhe kya bolte hai Aرسال
 Kyuki yaha to mere ghar ke sahare ne hi mujhe haara hua bol rakha hai
